This handout captures the quick-reference content shown in the three green boxes on the page.

Quick-reference visual from the page

Sense

- Find technologies, approaches, or market moves that could benefit the site or corporation.
- Spot threats from competitors, emerging therapies or technologies, or internal shifts such as strategy change or sister-site competition.

Seize

- Select options, evaluate fast, and exit early when criteria are not met.
- Deliver proof of concept and a clear, justified path.
- Win the decision through a compelling case, timing, and sponsorship.

Reconfigure / Exploit

- Turn insight into corporate advantage through recognised impact, career progression, and a strategic role for the site.
- Grow demand and capability on site; develop in-house or VRIN competencies at the right moment.
